

K-Gas Purchase Guide

When buying your cooking gas, please ensure the following:

- Always purchase your cooking gas from a branded KenolKobil Service station or an authorised KGas dealer
- Check that the quality assurance seal on the valve is not broken or missing
- Confirm the weight of the cylinder by having it weighed at the point of purchase
- On making payment, obtain an ETR receipt and an official Station receipt with cylinder serial number and gross weight indicated

Safe use of LPG

- LPG has a characteristic smell to alert you of a leak
- If you detect the smell, do not light a fire or operate any electrical switches. Open all doors and windows, disconnect the cylinder and place it outside the building.
- Safety check the cylinder for leaks using soapy water.
- If you detect a leak, return the cylinder to the station of purchase
- If the leak is not on the cylinder, ensure checks are done on the other fittings.
- Always store the cylinder in an upright position and ensure the cooker is higher than the cylinder.
- Use K- Gas recommended fittings. Ensure the hosepipe is replaced every two years and regulator every five years.

LPG Safety - In case of Gas leakage

- Turn off the regulator and remove regulator from valve..
- Ventilate the building by opening the doors and windows.
- Put off all naked flames.
- Do not switch on or off any electrical appliances, or use the telephone at the scene.
- Leave the house immediately and inform your neighbours.

First Aid for Inhalation of LPG Vapour

- Remove casualty to fresh air
- Keep casualty warm.
- If casualty is feeling dizzy, physical support may be necessary.
- If Casualty is breathing, but unconscious place in recovery position.
- If casualty has stopped breathing apply artificial respiration.
- Monitor breathing.
- Call for medical attention immediately.

First Aid for LPG Contact with Skin

- Drench affected parts with water.
- Remove contaminated clothing, rings, watches and etc if possible but do not attempt to do so if they are adhering to the skin.
- Cover with sterile dressing.
- Do not apply ointment or powder.
- Contaminated cloth must be soaked in water and laundered before re-use.
